## Deviation from Scheduled Practical Assessment Scenario Request.

Due to the fact Sitetrain’s training and assessment strategy (TAS) almost always entails training onsite, utilising onsite facilities and equipment and incorporating site critical standards for risk assessment techniques and hazard controls, this section provides authorisation by the client to deviate from the prescribed (TAS) using site specific training and assessment scenarios tailored to incorporate site based facilities. This is to ensure that students are not disadvantaged by assessing them against purely theoretical classroom-based scenarios to maintain compliance to the prescribed TAS, but rather be assessed more appropriately using their own systems.

**Assessor - Describe scenario:** Assessor to tick box if **no deviation** from TAS was required.

--

List critical equipment required for the execution of the scenario, i.e. “Tank 6”, ladder, gas monitor, extraction fans etc.

**Site Request:** I \_\_\_\_\_ who performs in the role as \_\_\_\_\_

on behalf of (company name) \_\_\_\_\_ request and authorise the use of the site based scenario detailed above, which utilises site facilities and equipment. I have read the prescribed assessment scenario and agree that assessing using it would be disadvantageous to our students as compared with the scenario detailed above.
