### HLTAID011 Provide First Aid

#### Target Core Skills

This task covers:

- Reading and answering questions
- Interpreting signs
- Solving problematic equations

#### Target Audience

This is a task that is designed for all industries.

#### Content Coverage

The stimulus material for this task is the questions and AED signs . The tasks require different processes including interpreting information, identifying signs, and solving mathematical equations. The candidates are required to recognised and interpret the information given.

#### Instructions to Assessor

This task requires the candidate to:

- listen to the assessor who will read each question
- interpret information
- complete the various activities based on the information

This task is designed to be delivered orally. However, candidates who are able to complete on their own are encouraged too.

Ensure the candidate understands the task before commencing. Provide the appropriate support for the level. Conclude the task once you feel the candidate has reached their highest level of performance.

Read the below information and give appropriate answers

1. What would this sign indicate in your workplace?

2. Give 30 compressions followed by 2 breaths, known as “30:2”. Aim for 5 sets of 30:2 in about 2 minutes (if only doing compressions about 100 – 120 compressions per minute). How many breaths do you do in a about 2 minutes?

3. Circle the word which can be used instead of the word that appears in “bold.”

a) The Supervisor told the trainee to **employ** good workplace habits.

hire                      use                      list                      explain

b) Risks associated with Health and Safety Hazards can be **minimised** in the workplace with good health and safety work practices.

avoided                      prevented                      reduced                      absent

4. Select the correctly spelt word in each section.

Example	Availability	Kleening
Xampel	Availability	Cleaning
Exanple	Avalability	Cleanning

5. 1kg of apples cost \$1.90. How much will 6kg cost? *Circle correct answer.*

\$6.90                      \$6.54                      \$11.40                      \$11.90
